Food Central @ Nanyang Polytechnic Design Concept

Design Concept

Furniture layout plan

The 270 sq m food central took the form of a H- shape space on the central part of the campus.

In developing the food central it was essential to create an emotional connection between student and place for student for study as well as group discussion.

The overall experience was split into three key zone, Zone 1 - A welcoming hangout and chill area, Zone 2 - cafeteria design cum study area, and Zone 3 - lounge area group discussion. Each zone works on different levels and have its own character, functionality, inviting different types of meeting and gathering. The materials throughout are inspired by nature, with a white green, and wood combination. The seating furniture is skillfully select to blend with the design concept.

The chill hangout area

In this context the pillar design forms an important eye catching point. With the name "Food Central" able for pedestrian to visible from all directions. The pillar design help to keep the noise level down. It's also create a direction welcome meeting point for student. The kidney shape platform creates a sheltered area that allows students to sit around while waiting or have a snack on the bar stool without obstructing the traffic

Cafeteria Design

The wide space entrance with double height ceiling gives the feel of outdoor dining. The parameter high wave decorative feature wall panel combination of carpetgrass and recess light enhances a "natural" look and reduce the sound echo. Inspired by a library reading area, the dining tables are designed with long white cake shape table which is similar to library seating, encourage students to do some readings. Overall ambiances create a modern, urban lifestyle environment.

Cozy Corner

It is situated further from the entrance. There are different types of seatings, and is meant for group discussion, meetings, and other activities. The wallpaper on the back wall is to soften the overall look and help with sound absorption.
